# ZG Graphical Interface Solutions
for the ZFP range of fire alarm panels

KEY FEATURES:

- Integrate one or more ZFP panels onto one easy-to-use graphical interface package

- Develop an extensive alarm audit trail

- Report and control alarm systems from one or more locations (subject to protocol release)

- Produce alarm history reports and trend analysis

- Create cause and effects between different and unnetworked systems (should not be used as a critical alarm path)

- Optional interfacing to other manufacturers' equipment (subject to protocol support and licence fee)

- Optional TCP/IP functionality allows connection to remote PC and other TCP/IP nodes

**Illustrative purposes only
(PC not included)**

Need a graphical front end for our ZFP range of touchscreen controlled analogue addressable fire panels? Look no further than our new ZG range of graphical interface solutions.

With a host of packages available, you can easily set up anything from a single panel graphical mimic type solution to a complex alarm management system connected to many panels from a multitude of different manufacturers (subject to protocol support/licence fee).

Our new ZG solutions provide an ideal way to view critical events, process alarms, keep secure system logs and even integrate new or legacy systems on single or multiple site operations.

If you are struggling with multiple system reporting, consider using our ZG solution to integrate standalone systems into one straightforward, manageable and convenient system without compromising individual system integrity.

ORDER CODES & DESCRIPTIONS

ZFP GRAPHIC INTERFACES & SOFTWARE	
A single PC-compatible graphical interface solution suitable for use on single or networked ZFP panels. Allows integration to other building systems (security, lighting, etc) subject to protocol support & licence fee.	
ZG1	ZFP Single Panel Graphics Interface (dongle and software) Accept, silence & reset controls. Full screen text and running events list.
ZG2	ZFP 1 to 5 Panel Graphics Interface (dongle and software) Accept, silence, reset, enable & disable controls. Full screen text, running events list and graphical site plan
ZG3	ZFP 1 to 5 Panel Graphics Interface (dongle and software) Accept, silence, reset, enable & disable controls. Full screen text, running events list and graphical site plan. Includes TCP/IP manager allowing connection to remote PCs & other TCP/IP nodes
